

The **Northwest Remediation Conference** keeps you current by bringing together contaminated site cleanup professionals, regulators, and public sector property owners to share knowledge and best practices, build relationships, and foster partnerships.

The conference opens with a Morning Keynote Panel featuring the **Washington Department of Ecology's Regulatory Update**, followed by a three track **Program** focuses on technologies & techniques, science & regulation, and brownfield development.

Select from a menu of trending topics such as:

- **Emerging Contaminant Concerns**
- **Implementing Combined Remedies**
- **When Construction Meets Cleanup**
- **Looking Beyond Traditional Brownfield Funding**
- **Understanding & Managing Project Permitting**

October will be here before you know it, so...
